Hiring Manager
Process9
Gurugram, Haryana

Dear Hiring Manager,

I am writing to express my interest in the AI/ML Intern position at Process9. I am currently pursuing a Bachelor of Technology in Computer Science and Engineering at VIT-AP University with a CGPA of 8.60. With a strong foundation in Python, machine learning, and deep learning, I am excited about the opportunity to contribute to your team while learning from experienced professionals.

I have worked on several AI projects that strengthened my practical skills. I developed an AI-powered Meeting Summarizer that uses speech-to-text and large language models to generate concise meeting summaries with key discussion points and action items. I also built a Hybrid Brain Tumor Detection model using CNN and GNN architectures that achieved 92% accuracy, and a Multimodal Emotion Recognition system using BERT and Wav2Vec 2.0 that achieved 86% accuracy.

During my AI internship at SmartInternz, I developed an e-commerce Shipping Prediction model using supervised learning techniques and achieved 90% accuracy. This experience enhanced my understanding of data preprocessing, feature engineering, model training, and evaluation on real-world datasets.

My technical skills include Python, SQL, TensorFlow, PyTorch, Scikit-learn, FastAPI, Streamlit, AWS, and Git. I am particularly interested in Process9 because of its work in Machine Translation, Synthetic Data Generation, and AI-driven language technologies. I am eager to apply my skills while continuing to grow as an AI engineer.

Thank you for considering my application. I would be grateful for the opportunity to discuss how my skills and enthusiasm can contribute to Process9. I look forward to hearing from you.

Sincerely,

Vajrala Jogendra Venkata Abhishek
